(54) Title: HETEROCLITIC ANALOGS AND RELATED METHODS

(57) **Abstract:** Heteroclitic analogs of class I epitopes are prepared by providing conservative, semi-conservative, or non-conservative amino acid substitutions at positions 3 and/or 4 and/or 5 and/or 6 and/or 7 and/or 8 and/or 9 and/or 10 of these epitopes. The analogs are useful in eliciting immune responses with respect to the corresponding wild-type epitopes.
